UNIVERSITY OF LEEDS

The University of Leeds is committed to the health and wellbeing of staff, students and visitors. To inspire people not to smoke, we are taking the first step to become a Smokefree campus.

Why are we going Smokefree?

- We want to act as a role model for young people; if a young person does not start smoking by the age of 26 they probably never will.
- As a research institution training healthcare professionals we know that smoking is the biggest cause of preventable death in England.
- Reflecting the changes in society - the rate of smoking is reducing nationally and only 14.4% of adults are current smokers.
- Aligning with city partnerships to create a Smokefree culture for all.

What's happening

We're asking everyone – staff, students, visitors and contractors – not to smoke **outside** between 8am and 6pm every day on:

- **Main campus** - LUU and between Woodhouse Lane, Clarendon Road, Mount Preston Street, Leeds General Infirmary and the inner ring road
- **Western Campus** (Leeds University Business School and Law School)
- **Fairbairn House**
- **University residences**
- **University sports facilities**

Smoking and vaping are still prohibited inside University buildings, by entrances and covered walkways.

You can still vape outside on the Smokefree campus as this can be an aid to quit smoking.

Quit Smoking support for staff and students:
